

## Rubber Roller APR-97 Series for Peel Test

- Enables the user to stick samples with an even pressure for more accurate measurement of peeling force
- Complies with corresponding part of ISO and JIS. The weight and size can be customized for other standards such as ASTM. A motorized roller is also available as a customized option.

### [Customization]

Customization of roller mass, width, outer diameter, etc. are available.  
Please contact us for customized products that comply with standards.

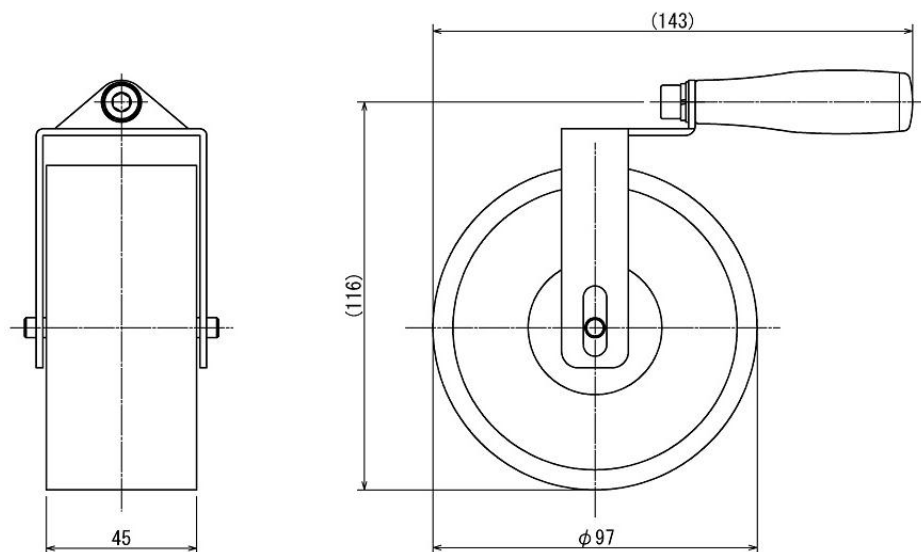

Available customization	
<b>Mass (*1)</b>	100 to 5000g
<b>Width</b>	30 to 300mm
<b>Material</b>	Antistatic urethane rubber (Hardness: A80) (*2)
<b>Standards (*3)</b> (complying with corresponding part only)	<b>-ASTM D3330/D3330M</b> [Standard Test Method for Peel Adhesion of Pressure-Sensitive Tape] <b>-ASTM D6252/D6252M</b> [Standard Test Method for Peel Adhesion of Pressure-Sensitive Label Stocks at a 90°Angle]
<b>Motorized roller</b>	 <p>The motorized roller allows bonding of a sample at a certain pressure and at a constant speed to enhance testing repeatability.</p>

\*1 Limited on the combination of roller mass and width. Please contact us for details.

\*2 Antistatic specification for preventing static electricity and so on.

\*3 Please contact us for other standards.

### [Dimensions for APR-97 series]
